OBJECTIVE

Software Developer with hands-on experience in full-time product development and machine learning systems. Strong in backend development, real-time systems, and ML pipelines. Proven ability to build scalable platforms, integrate APIs, and deliver production-ready solutions. Passionate about performance optimization and impactful engineering.

SKILLS

Technical Skills: Python, JavaScript, TypeScript, C++, Java, Node.js, Express, Next.js, REST APIs, WebSockets, MongoDB, PyTorch, TensorFlow, YOLOv2, OpenCV, Git, Docker, AssemblyAI

Core Concepts: Data Structures & Algorithms, OOPS, System Design Fundamentals

EDUCATION

Shri Vaishnav Institute of Technology & Science
Bachelor of Technology in Computer Science (CGPA: 7.6/10)

2022 – 2026
Indore, MP, India

EXPERIENCE

Software Developer | Ninexfold **Apr 2025 – october 2025**

- Developed ATS platform modules including authentication, role-based access, and analytics dashboards
- Built low-latency real-time features using **WebSockets** and cloud integrations
- Improved backend performance and deployment pipelines

Software Development Intern | Coreintels Pvt Ltd **Nov 2024 – Jan 2025**

- Built microservices and optimized API response times
- Worked on socket-based real-time features
- Contributed to frontend and backend development

PROJECTS

Jasmine by Seba – E-Commerce Mobile App | *React Native*

- Developed a production-ready e-commerce mobile application
- Implemented product listings, cart, and checkout flow
- Live App: App Store Link

NeuroTract – Behavioral Analytics System | *Python, PyTorch, OpenCV, Flask*

- Built multimodal ML pipeline combining keystroke, face & speech analysis
- Generated interpretable risk assessment reports

Stress Detection Analyzer | *TensorFlow, AssemblyAI*

- Built audio-based stress detection models
- Created REST APIs for inference

CERTIFICATIONS

NPTEL – Cloud Computing : Certificate
NPTEL – Programming with Python : Certificate **NPTEL – soft skills**
: Certificate

ACHIEVEMENTS

- Runner-up – National Hackathon 2023
- Runner-up – 10+ hackathons
- Led team projects with real-world ML applications
